

## **Kazakhstan COVID-19 Travel Update – April 8, 2021**

### **Entry Restrictions:**

Kazakhstan has restricted the entry of most foreign nationals and suspended most flights except for state flights, ferry flights, sanitary flights, and technical landings for refueling purposes. From June 20, Kazakhstan will reopen flights from China, Georgia, Japan, South Korea, Thailand, and Turkey; however only certain categories of people will be allowed to enter on these flights. These include diplomats, direct-family members of Kazakhstani citizens, residency permit holders, and some employees of designated companies in critical industries.

### **Entry Requirements:**

As of October 6, all foreign travelers arriving in Kazakhstan will need to provide proof (via PCR test and dated no more than 3 days before their arrival to Kazakhstan) of their negative status for COVID-19. Those without test results will be held for up to two days in a quarantine facility in the city of their arrival and tested for COVID-19.

### **Quarantine Requirements:**

Travelers entering Kazakhstan who either display symptoms or test positive for Coronavirus are currently required to self-isolate for 14 days. Those needing medical assistance may be confined in state facilities. Individuals in self-isolation at home may be required to download the Smart Astana app, which will be used to monitor compliance with self-isolation restrictions.

There are currently 28,068 active cases of COVID-19 diagnosed in Kazakhstan and 3,240 deaths as of April 4, 2021.
